Get Details on City Road Construction Projects with Interactive Maps Online or Via Your Smartphone

The City of Farmington Hills will be undertaking several road construction projects this spring and summer and residents are encouraged to stay informed. Projects will involve both major roads and local roads with many being reconstructed or resurfaced. The Michigan Department of Transportation (MDOT) and the Road Commission for Oakland County (RCOC) will also have projects underway in Farmington Hills during the construction season.

Anyone who lives and works in Farmington Hills or will be impacted on their commute through the City is encouraged to view the new Interactive Road Construction map available on the City website. Go to www.fhgov.com then click on the traffic cone located on the orange Road Construction tile on the main page, or access the map via a direct link at <https://fhgov.maps.arcgis.com/apps/MapSeries/index.html?appid=049be0c0d85c45af8e6f174c1689fbe9>.

The Interactive Road Construction map provides further details about each project's location and parameters, and also includes information about drains, sidewalks, intersections, and utilities that will be under construction in 2019.

"Providing residents and commuters with this information via an online interactive map will help them avoid areas that are under construction," said Matt Malone, GIS Coordinator. "We appreciate everyone's patience as we improve the roads in Farmington Hills."

For more information about the interactive map, contact Matt Malone at 248-871-2434 or mmalone@fhgov.com. For more information on construction projects, contact the Engineering Division at 248-871-2560.
